attacking players must retreat outside the blue line before any are allowed to return to the attacking zone.

- 9.2.4. Icing is defined as an instance where a defending player propels the puck from within the defending zone, across both red and blue lines and across the defending goal line without either team being able to touch the puck. Aggressive fore-checking is dangerous to a defending player, especially at or near the end boards. When icing is observed, players from either team including those on the bench should call out "icing!" to draw attention to the infraction so that all players are aware of the restriction on fore-checking. In the instance of icing, players may not aggressively pursue the puck past the opposing blue line until an opposition player (including the goalie) has touched it. Once the puck has been contacted by an opposing player, an attacking player may skate with vigor over the opposing blue line; toward the opposing puck carrier.
- 9.2.5. If the "icing" call is not observed, there will be a stoppage in play, the puck is given to the defending team and all attacking players must retreat outside the blue line before any are allowed to return to the attacking zone.

9.3. Goalie Protection

- 9.3.1. If the puck is under the control of the Goalie, either by reason of being caught up in equipment or by intentional covering or "freezing" by the Goalie, play shall be halted. The primary purpose is to protect the Goalie from injury. A secondary purpose is to reflect the absence of game officials. In a case where the puck is under control of the Goalie, the puck is given to the defending team and all attacking players must retreat outside the blue line before any are allowed to return to the attacking zone.
- 9.3.2. If the puck is in the goal crease (blue paint) but not under control of the goalie, play continues until:
 - 9.3.2.1. The goalie controls the puck;
 - 9.3.2.2. The puck is in the net (goal), or
 - 9.3.2.3. The puck is retrieved and directed elsewhere on the ice surface.

10. CONDUCT AND DISCIPLINE

10.1. Player Conduct

- 10.1.1. Each player should have as his objectives, exercise and congenial social interaction.
- 10.1.2. Each player is completely responsible for his own actions, including how he chooses to react to a perceived infraction of the rules against him. Abusive verbal reactions or aggressive physical reactions are both choices that are unacceptable.
- 10.1.3. If a player feels strongly about an incident, he should report the matter to the Discipline Committee for further action.

10.2. Position Rotation

- 10.2.1. Aside from goalies, players are expected to be able to play in any required position. No player is allowed to make an exclusive claim on any position, defense in particular, and may be requested to fill a different position.
- 10.2.2. The PC determines positional assignments and may request positional changes during the course of the game.
- 10.2.3. Positional requests should be made and received in a gentlemanly manner. Abusive responses or refusal to comply may be subject to disciplinary action; including a warning, suspension, or revocation of membership. Equipment.
- 10.2.4. Shift changes should be of a duration not to exceed two (2) minutes and should be aligned with line mate shift change. Active members that persistently overstay shift changes may be subject to penalties determined by the PC; working with consultation from the DC.

10.3. Equipment

- 10.3.1. Players must have at least two jerseys. One must be substantially BLACK and the other substantially WHITE. Some graphics are allowed but should not dominate the background. Sleeves must match the body of the jersey. Socks must be substantially BLACK or WHITE and reasonably match the jersey.

	West Kelowna Senior Warriors Hockey Club	Page:	22 of 39
		Date:	Aug 03, 2025
	Procedures	Rev:	F

- 10.3.2. Backgrounds other than BLACK or WHITE (such as grey, yellow, red, green) are not allowed as they create ambiguities during play.
- 10.3.3. All Active members must wear a face shield while on the ice during a hockey game. The shield may be a half shield, full shield or full cage. It is recommended that only CSA approved shields be worn and attached according to the manufacturer's recommendations.
- 10.3.4. If the half shield option is chosen, a CSA approved mouth guard is required to comply with CARHA player insurance coverage.
- 10.3.5. Cut protection equipment such as socks or neck guards are strongly recommended but are optional.
- 10.3.6. Equipment must be maintained in reasonable condition. Damaged skates, cracked helmets, badly scratched or chipped facial visors, cracked or chipped sticks, dangling cloth, tape or strings are not allowed and offenders may be subject to disciplinary action; including a warning, suspension, or revocation of membership.
- 10.3.7. Aftermarket or custom additions or modifications to equipment that may be hazardous to the Active member or other Active members are not permitted and offenders may be subject to disciplinary action; including a warning, suspension, or revocation of membership.
- 10.3.8. If an Active member cannot repair or replace unauthorized or defective equipment prior to or during a game, he/she may be restricted from participating. Continued participation by the affected Active member is at the discretion of the HSC or his/her assistant or, in the absence of an Health and Safety representative, the PC.

10.4. Discipline Guidelines

- 10.4.1. The Discipline Coordinator (DC) shall form a Discipline Committee consisting of the PC from each age Division plus at least one (1) and not more than two (2) additional Active members from their respective Divisions to monitor conduct and implement disciplinary protocols.
- 10.4.2. The primary goal as hockey players is to resolve disagreements responsibly and rationally at the time. Ideally, those involved in an altercation come to an amicable agreement on the ice, on the bench or in the dressing room after the game.
- 10.4.3. In situations where a resolution is not forthcoming, the DC or one of the DCM's may intervene immediately or may be contacted by an Active member afterwards.
- 10.4.4. DCM's present will investigate and verify alleged infractions. Eye witness reports must be verified in writing. Email is acceptable for statements from other Active members.
- 10.4.5. In support of disciplinary actions against the offending Active member(s), each investigation must be documented on the Discipline Complaint form (Exhibit 12.2).
- 10.4.6. To promote consistency of investigative outcomes, it is recommended that investigators follow the Discipline Action Flowchart (Exhibit 12.3) to guide them through the process.
- 10.4.7. Once the investigation is complete and a course of action determined (warning, suspension, revocation of membership), the DC and the PC for the Division will sign the form and forward all records of the investigation to the Director of Member Management (DMM) for archiving.
- 10.4.8. The DMM will inform the offending Active member(s) in writing and ensure a copy is included in the member's personal file.
- 10.4.9. Documented infractions that are five (5) calendar years or older may be disregarded when considering Active member behavior regarding subsequent incidents.

11. RULE INFRACTIONS

Prospect Evaluation System

Rev: F

1. Requirements:

- 1.1. Each member of the evaluation team must have a hard copy of the evaluation form, a writing tool and a solid support to write on; such as a clipboard or portfolio.
- 1.2. Video capability such as a video recorder, camera or cell phone camera is an optional asset.

2. Prospect Evaluation Process

- 2.1. Before becoming a member, a Prospect will be required to submit a membership application form.
- 2.2. Prior to engaging a Prospect, a verbal assessment by the DMM or Division PC is recommended. Prospects should be able to describe their previous hockey playing experiences before being offered an on-ice evaluation opportunity.
- 2.3. If the verbal assessment confirms previous hockey experience, the Prospect will then be offered an initial ice time in the appropriate Division as a paying guest.
- 2.4. The DMM in conjunction with the PC will then enlist one or more experienced members from the Division to form a team ("Evaluation Team") to assess evaluate the ability of the individual to play at an appropriate level for the assigned Division.
- 2.5. The PC will inform the Prospect that his/her preliminary game is for evaluation only. Prior to ice time, the PC shall:
 - 2.5.1. Welcome the player and introduce him/her to other players;
 - 2.5.2. Inform the player that all or part of the game may be recorded on video. If the player objects, they may withdraw from the evaluation. By participating, they are approving the use of video recording as an evaluation tool.
 - 2.5.3. Ensure the player has the appropriate Hockey Club ticket and understands the sign-in waiver, and
 - 2.5.4. Provide the player with an overview of local playing rules (icing, offsides, stoppage) and expected physical conduct; both given and received.
- 2.6. Prospects that achieve ~~a ranking of level 3~~an evaluation score of 30 or higher may be recommended for new or continued membership in the Club.
- 2.7. If the Prospect achieves a positive evaluation relative to the Division applied for, the DMM may recommend to the Board of Directors ("Board") that the Prospect become an Active member. If the Board accepts the Evaluation Team recommendation, the Prospect will be:
 - 2.7.1. Placed on the Spare list in the order of the date of his/her application, and
 - 2.7.2. Informed by the Board in writing of his/her acceptance.
- 2.8. If a Prospect does not achieve a positive evaluation, his/her application will be ~~deferred or~~ declined in writing by the Board, including reasons that are based on the records provided by the Evaluation Team.

3. Assessment Protocol:

- 3.1. The number of games allotted for a Prospect skill evaluation may vary between one (1) and four (4) at the discretion of the PC, based on the Prospect's previous playing history. Prospects returning from a long break from playing may need multiple observations to be accurately categorized.
- 3.2. The Player Coordinator ("PC") for the Division and at least one (1) member of the evaluation team shall be present at each observation event.
- 3.3. The PC must be present whenever other members of the evaluation team are conducting their observations.
- 3.4. Each member of the evaluation team must have a minimum of thirty (30) minutes of uninterrupted time for each observation conducted.

4. Observation Records:

- 4.1. Each Evaluation Team member shall generate their own, unique evaluation record for each observation event they attend.
- 4.2. Observation results shall be kept in confidence with the Evaluation Team and should not be discussed with the Prospect being evaluated.

- 4.3. ~~Observation~~Evaluation records, including available video, shall be forwarded to the PC for analysis and further processing.
- 4.4. A compilation of all evaluation records generated, including a final recommendation, shall be submitted to the DMM not later than one (1) day after the final evaluation game.
- 4.5. In order to make an on-ice evaluation fair and consistent, the evaluation team shall record the Prospect's ~~performance~~proficiency using the following five categories. The category spectrum is coarse enough to accommodate natural variation through one, and up to four evaluation ice times.

5. ~~Ranking~~Proficiency~~Scale~~Categories

The Prospect ~~ranking~~proficiency is based on five categories as follows:

- 1) Exceptional player – Exceptional speed, exceptional puck handling, good play making, good passing, plays well under pressure. Plays unselfishly and maintains a congenial attitude
- 2) Superior player — Superior speed, good puck handling, good passing, plays well with a small amount of time and space. May have minor physical or sight limitations or be recovering from injuries. Plays unselfishly and maintains a congenial attitude.

6. Total Ranking Score:

- 6.1. In order to fairly and accurately ~~rank~~place a Prospect, individual scores from one or more attribute observations such as skating, passing, stick handling, shall be compiled to produce an average value for that attribute.
- 6.2. The average attribute score(s) shall then be added up to produce a total score.
- 6.3. The individual shall then be classified according to the total score as follows:
 - 1) between 40 and 45
 - 2) between 35 and 39
 - 3) between 30 and 34
 - 4) between 25 and 29
 - 5) below 25
- 6.4. Prospects with an average score of thirty (30) or higher may be recommended for membership.
- 6.5. Prospects with an average score between twenty-five (25) and twenty nine (29) may have ~~their~~the ~~Board's~~the ~~decision to consider the Prospect's~~ membership application deferred for a period of time to be determined by the Board.
